All parties involved in this Memorandum of Understanding are collectively referred to as the “Working Group.”

A. PURPOSE:

The purpose of this Memorandum of Understanding, herein referred to as “MOU”, is to provide the framework of a process for the Working Group to consider and implement annual fuels treatment program of work within their respective jurisdictions to provide for community protection and enhance the health of forests and rangelands. This collaborative process is provided for and shall be consistent with, the goals, performance measures and collaborative framework outlined in the 10-Year Comprehensive Strategy and Implementation Plan, also known as the National Fire Plan, and the National Cohesive Wildland Fire Management Strategy. The Working Group recognize that fuel treatments should be prioritized and selected through a timely collaborative process and should be coordinated across land ownerships and jurisdictions to protect communities and improve forest and rangeland health. This will be accomplished by concentrating on high priority acres that are: 1) in the wildland – urban interface and, 2) outside the wildland-urban interface that are in condition classes two and three. (Refer to links below for the National Fire Plan and the National Cohesive Wildland Fire Management Strategy for descriptions of goals, outcomes, performance measures, tasks, monitoring and glossary of definitions).

B. IT IS MUTUALLY AGREED AND UNDERSTOOD THAT THE WORKING GROUP SHALL:

1. Collaborate, by notification and discussion, a proposed annual program of work for fuel treatment consistent with the process identified in this MOU for the Development of a Collaborative Fuel Treatment Program and the goals, performance measures and collaborative framework of the 10-Year Plan and the National Cohesive Wildland Fire Management Strategy. The amount of collaboration will be consistent with land ownership, resource management issues, and the number of interested stakeholders. Views of all relevant partners and stakeholders will be considered and final decisions will be made in accordance with law.

The Lassen County Fire Safe Council, Inc., a local work-group comprised of the FS, CalFire, and BLM Interagency Fuels Teams, Lassen County representatives and other public and private parties will provide the forum for implementation of this MOU.

2. Complete, each Federal fiscal year, proposed programs of work that will:
a. Focus on actively managing acres in the wildland-urban interface and acres outside of the wildland urban interface that are in condition classes two and three consistent with the goals and performance measures of the 10-Year Plan and the National Cohesive Wildland Fire Management Strategy.

b. Place priority on treating acres within the County that are actively incorporating federal, state, county, and tribal projects into the joint program of work. On a case-by-case basis, participating parties shall work with their local partners, tribes, and federal agencies to identify communities and landscapes at risk from wildland fire, and prioritize them by consensus of the Working Group at annual meetings. Based on these priorities and using a collaborative process, partners will annually identify high priority fuels reduction projects for their respective lands. Calfire, FS and BLM will use the Community Wildfire Protection Planning effort to identify projects for the units, to fully incorporate projects into an annual program of work, in accordance with each agency’s laws and policies.

c. Consider multi-year landscape projects that may or may not cross over multiple land ownerships and jurisdictional boundaries.

d. Be based on agencies’ budgets and adjusted as necessary, in accordance with appropriations and final agency budget allocations. If funding will be exchanged between the parties, the parties shall execute a separate funding document in accordance with each party’s policies and procedures.

e. Consider long-term goals and objectives that will be strategically located and implemented across the landscape.

3. The Fire Safe Council may develop a local educational program that includes Firewise/Fire Safe messages. The Fire Safe Council may collaborate with participating parties of the Working Group and execute agreements in accordance with each participating party’s laws and policies.

C. IT IS MUTUALLY AGREED AND UNDERSTOOD BY THE WORKING GROUP THAT:

1. The FS has previously entered into a Memorandum of Understanding for the Development of a Collaborative Fuel Treatment Program (FS Agreement #06-MU-11050650-005). It is understood that this MOU replaces the previously executed MOU referenced above.

2. The FS Supplemental Provisions attached as Attachment A are hereby incorporated and made part of this MOU.
3. This MOU outlines the process to synchronize the critical steps to accomplish selection of projects by each Federal fiscal year, as allowable. It is understood that this MOU will not function independently of the process of each federal agency.
